HIGH TEMPERATURE TECHNOLOGY

Index to Volume 8 (1990)

No 1 February pp 1–72
No 2 May pp 73–176
No 3 August pp 177–240
No 4 November pp 241–312

Articles

1 A parameter for power law creep
V. M. Radhakrishnan 273

2 Application of laser flash method to penetrative materials for measurement of thermal diffusivity
K. Inoue 21

3 Carbide changes and sulphur segregation in CrMo steel during creep
F. Masuyama
N. Nishimura
Y. Takeda 257

4 Characterization of low chromium ferritic steels for use in fluidized bed combustion systems
A. J. Minchener
D. M. Lloyd
J. Stringer 45

5 Comparison of dynamic softening in 301, 304, 316 and 317 stainless steels
N. D. Ryan
H. J. McQueen 85

6 Crack initiation and crack propagation under thermal cyclic loading
K. Bethge
D. Munz
J. Neumann 98

7 Creep crack growth in type 316 stainless steel and its weldment
V. M. Radhakrishnan
M. Kamaraj 219

8 Experimental simulation and theoretical modelling of crack initiation and propagation due to thermal cycling
H. P. Lieurade
A. Dias
J. Giusti
A. Wisniewski 137

9 Fracture evaluation of surface cracks in light water reactor pressure vessels under pressurized thermal shock loading
K. Kussmaul
A. Sauter
R. Stegmeyer
W. Guth 121

10 High-temperature fracture of composite materials
M. Tanaka
H. Iizuka 208

11 Improvement in oxidation resistance of the intermetallic compound titanium aluminide by heat treatment under a low partial pressure oxygen atmosphere
E. Kobayashi
M. Yoshihara
R. Tanaka 179

12 Interaction of carbon, boron and sulphur in superalloys
Y. Q. Li
J. Y. Liu 278

13 Introduction to thermal shock
R. P. Skelton 75

14 Isochronal aging behaviour of Al–5.8%Mg alloy during deformation
A. M. Hammad
O. A. Rugebani 261

15 Multi-axial creep of thick-walled tubes of type 316 austenitic steel at 600°C
J. Henderson 243

16 Operation of an isostatic hot press with a rapid cooling system
K. Kugeler
P.-W. Phlippen
P. Schmidtlein 9

17 Optimum pressure ratios for different gas turbine cycles
Y. S. H. Najjar
M. S. Ismail 283

18 Processing effects on the morphology of titanium carbide in self-propagating high-temperature synthesis
Yong Choi
M. E. Mullins
K. Wijayatilleke
J. K. Lee 227

19 Recovery of nickel-base alloys from boiler deposits to produce stainless steel grades
S. Z. El-Tawil
S. A. El-Ghazaly
M. M. Nasr 53

20 Selective hardening of high-carbon steel using an argon thermal plasma jet
F. W. Giacobbe 3

21 Tensile strength of cracked ceramic specimens in lower-quality-fuelled combustion gas streams
Y. Munakata
T. Senda 252

22 The determination of surface tension at elevated temperatures by drop image analysis
M. Askari
A. M. Cameron
J. Oakley 201

23 The development of a novel temperature indicator
J. K. L. Lai
S. T. Chan
B. Duggan 18

22 The determination of surface tension at elevated temperatures by drop image analysis
M. Askari
A. M. Cameron
J. Oakley 201

23 The development of a novel temperature indicator
J. K. L. Lai
S. T. Chan
B. Duggan 18

24 The use of RF heating for cyclic thermal shock testing
J. B. Love 146

25 Thermal downshock fatigue testing in AISI 316 stainless steel plate
S. T. Hasan
M. W. Brown 89

26 Thermal fatigue cycling in turbine blades
M. H. Coney 115

27 Thermal shock testing in heat treatment salt baths
R. D. W. Bestwick 153

28 Thermal shock testing of type 316 stainless steel using sodium
J. E. Cordwell 158

29 Thermal-shock-induced crack arrest of two low-alloy steels
M. Di Fant
A. Genty
A. Pineau 105

30 Work hardening, strength and ductility in the hot working of 304 austenitic stainless steel
N. D. Ryan
H. J. McQueen 27

Book reviews

Heat Treatment '87 64
High Temperature Corrosion of Ceramics 175
High-Tech Ceramics – Viewpoints and Perspectives 238
Metal Matrix Composites: Thermomechanical Behaviour 237
Research and development for High Temperature Materials for Industry 305
Steam Plant for the 1990s 304

Conference reports

9th European Congress on Corrosion 235
Advanced engineering with ceramics 301
Application of fracture mechanics to failure analysis and to residual life assessment of components operating at high temperatures 173
Ceramics in energy applications 298
Ceramic-ceramic composites II 234
High performance materials: HIPERMAT '89 Conference 65
International conference on sintering of multiphase metal and ceramic systems 68
Life assessment and repair technology for combustion turbine hot section components 300
Mechanical testing, high temperature attainment, measurement and control 290

TechAlert

Developments in refractory materials 172
Hot-salt corrosion 172
Interfacial compatibility in hybrid material systems 233
Metal matrix composites 172
Metastable processing paths for high temperature alloys 63
Oxidation behaviour of FeAl + Hf, Zr, B 63
Oxidation studies of alloys 233
Solid lubricants 172
Transformation toughener for ceramic matrix composites 233

High temperature topics

Ceramic matrix composite for aerospace applications 169
Cooling technique for HIPed turbine parts 231
Coriolis-effect mass flow meter designed for hot process fluids 58
Heating modules for furnace construction 59
Joining of metal matrix composites 169
Longer carbon fibres improve heat insulation 58
Metal Injection Molding II 231
Plasma spraying for super conducting oxide films 169
Plasma spraying for titanium MMCs 59
Portable radiation thermometer 231
Thermocouples for the glass industry 171
TiC and SiC whiskers made in CVD pilot reactor 59
Ultrasonic flaw detector 58
